

The Cutting Edge
of Clean

Harmony™

Robotic Pool Cleaner
With Integrated Salt Chlorinator

- ◆ The only Cleaner That Chlorinates
- ◆ Cleans Pools Up To 25,000 Gallons
- ◆ No Installation Required

Introducing Harmony, the only cleaner that scrubs dirt from your entire pool, including the waterline, AND uses salt sanitation to remove bacteria from the water. Total pool cleaning has never been done so easily and so beautifully.

Harmony requires no installation and operates independently of your existing pool pump, saving up to 50% of your pool electrical costs. Because Harmony distributes chlorine while moving all over the pool, the result is even distribution of sanitizer to every part of the pool...even dead spots where algae blooms and dirt accumulates. There is no other cleaner or inline salt system alone that can do what Harmony does for your pool! It's the perfect balance of clean and chlorine.

Harmony™

Robotic Pool Cleaner

With Integrated Salt Chlorinator

Clean and simple salt sanitation technology.

Patented cell produces chlorine from salt added to pool water

Motor module holds pump and drive motors

Clear filter lids allow visual inspection while cleaner is underwater

Rugged body and undercarriage

UV resistant body and undercarriage

Bottom brush scrubs all surfaces

Drain ports allow for easy removal from the water

Telescoping suction ports get all the dirt all the time

User Friendly Power Supply With Push Buttons and LED Indicator Lights

Specifications

- Pool size-up to 25,000 gallons and up to 35 feet long
- Cable length- 60 feet
- Input power-115/230 VAC, 50-60 Hz
- Total Output Power- 6-30VDC, 180 Watts
- Chlorine-0.7 lb/day(14 grams/hour)
