

THE TECHNOLOGY OF salt³

integrated salt ozone system

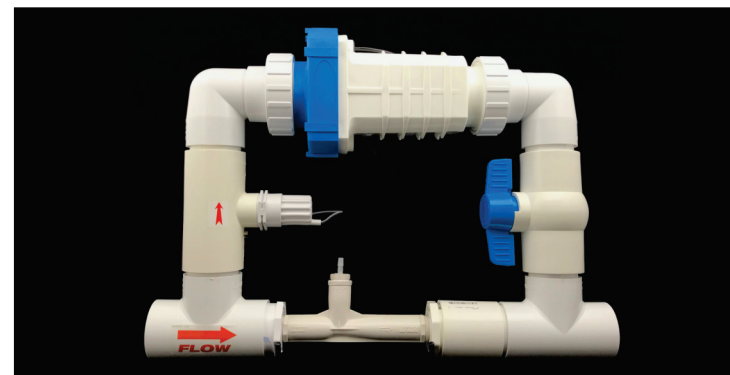

salt³

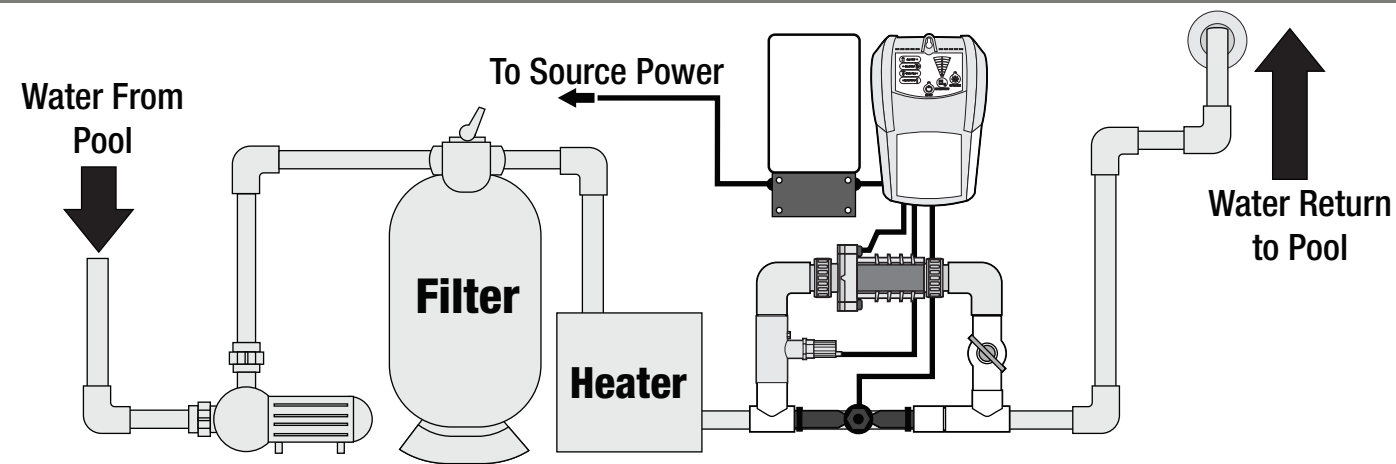

PRODUCT QUALITY
All Salt3 components are preassembled at our US factory for the highest level of quality and consistency.

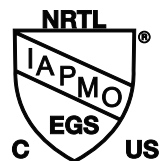

The Salt3 Generator Assembly mounts to the wall near the equipment pad. It contains the power supply and circuitry for both the salt and ozone systems and is prewired for connection to source power.

The Manifold Assembly is inserted into the PVC plumbing after the other equipment. It contains the salt conversion cell and control the flow of water and ozone into pool

LIT 0060

SPECIFICATIONS
PVC Pipe connections: 2 inch PVC pipe
Input Power: 120/240VAC 60Hz (US);
Power Consumption: 100-240 Volt; 50/60Hz; 2.0/1.1 Amp
Maximum Operating Pressure: 50 psi
Operating Flow Range: 20-100 gpm

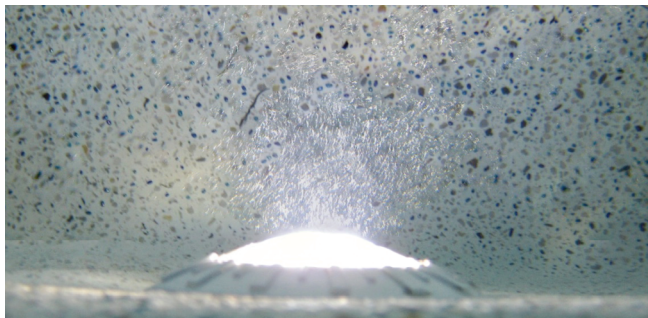

NEW SALTWATER TECHNOLOGY

THE HEALTHIEST WATER ON EARTH

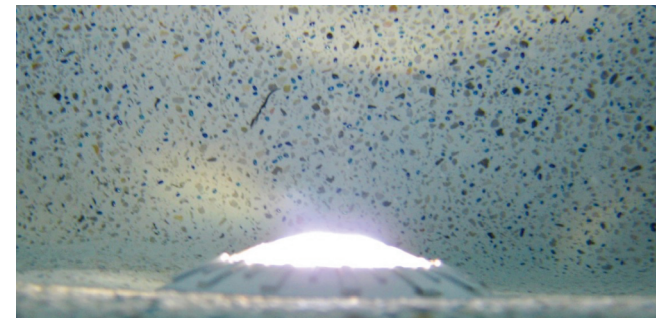

THE BEAUTY OF salt³

THE SCIENCE OF salt³

Water this beautiful simply was not available until now. The efficiency of the Salt3 system produces the cleanest, clearest, safest water on the planet.

Typical Debris Seen in Underwater Light Beam

Same pool after one week using Salt3
Debris is removed!

Affordable

- Salt3 gives you all the advantages of saltwater pools with none of the shortcomings, at a price comparable to an old fashioned salt system. -Because theSalt3 eliminates the need for additional chemicals, a Salt3 System saves you even more every month.

YOUR SATISFACTION GUARANTEE

We're so confident that you'll love your Salt3 pool, we guarantee your satisfaction! If your pool turns green or cloudy during the first year of using the system, simply go online and request our FREE cleanup kit which will be shipped immediately at our expense.

- No More Chlorine Odor
- No More Red Eyes
- No More Dry Skin

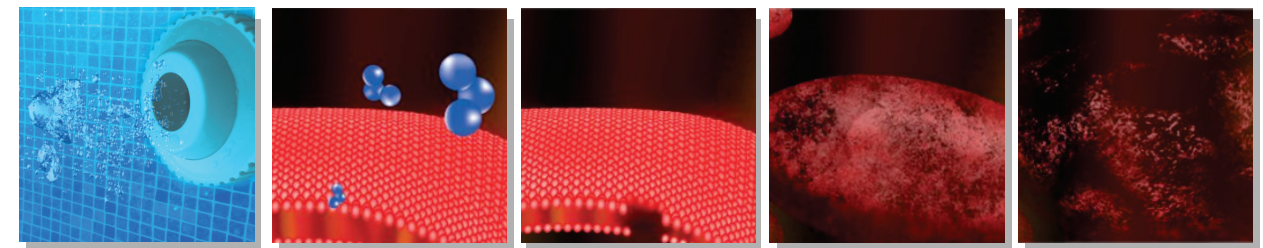

Sanitizing Checklist: Salt3 vs Ordinary Sanitizers

	Common Bacteria	Algae	e Coli	Urea (Urine)	Legionella	Poliovirus	Meningitis	Pseudomonis	Cryptosporidium	All Organics
Salt3	●	●	●	●	●	●	●	●	●	●
Ordinary Salt System	●									
Chlorine	●									

The invention of the saltwater swimming pool in the 1980s was an important advancement in the safety and ease of caring for pools. But as great as salt pools are, there are shortcomings with the 40 year old technology because it still needs help to kill algae, bacteria and viruses.

By adding ozone to the water as another layer of oxidation, Salt3 gives you all the advantages of saltwater pools with none of the shortcomings, at a price comparable to an old fashioned salt system.

How Does Ozone Work In Addition To Salt Sanitation?

Ozone (O₃) is injected into the pool automatically

O₃ molecules make contact with the cell wall and create a hole in the wall

The cell wall is broken down quickly by O₃ molecules

The cell loses its shape as O₃ continues to create holes in the cell wall

In a few seconds, the cell cannot maintain its shape and the cell dies

THE RESULT

The combination of ozone with saltwater technology is faster and more efficient than ordinary salt systems!

The result is the most amazing water ever!!
